

Ideation Phase Empathize & Discover

Date	31 July 2026
Name	Bala Aditya N
Project Name	Automated Network Request Management in Service Now
Maximum Marks	4 Marks

Empathy Map Canvas:

THINK & FEEL

- Need network resources without unnecessary delays.
- Expect a simple and user-friendly request process.
- Want timely approval and provisioning.
- Prefer transparency throughout the request lifecycle.
- Concerned about request accuracy and processing time.

HEAR

- Submit requests through the Service Catalog.
- Administrator approval is required before provisioning.
- Notifications will be sent after each workflow stage.
- Ensure all request details are accurate.
- Contact IT support for unresolved issues.

SEE

- Service Catalog request form.
- Approval workflow managed through Flow Designer.
- Email notifications for request status.
- Network administrators reviewing requests.
- Backend records updated after approval.

SAY & DO

- Submit a network resource request.
- Select the required device and connection type.
- Provide address and user details.
- Monitor the request status.
- Review approval or rejection notifications.

PAIN

- Manual approval delays.
- Lack of real-time request tracking.
- Manual data entry errors.
- Repeated follow-ups with IT staff.
- Delayed network provisioning.

GAIN

- Faster request processing.
- Automated approval workflow.
- Accurate database record creation.
- Real-time status notifications.
- Improved efficiency and user satisfaction.
