

## Ideation Phase

### Brainstorm & Idea Prioritization Template

|               |                                                    |
|---------------|----------------------------------------------------|
| Date          | 31 July 2026                                       |
| Name          | Bala Aditya N                                      |
| Project Name  | Automated Network Request Management in ServiceNow |
| Maximum Marks | 4 Marks                                            |

#### Brainstorm & Idea Prioritization Template:

##### Step-1: Select the Problem Statement

- Analyze the current manual network request process and identify existing challenges.
- Review the Service Catalog variables (device\_type, connection\_type, address, and user\_name) along with the workflow requirements.
- Identify the key stakeholders involved, including the Requester, System Administrator, and IT Network Team.
- Prioritize solutions that reduce provisioning time, eliminate manual logging errors, and enhance the overall user experience.

### Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

 10 minutes to prepare  
 1 hour to collaborate  
 2-8 people recommended

#### Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

 10 minutes

---

A

##### Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B

##### Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

C

##### Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

1

#### Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

 5 minutes

PROBLEM

How might we [your problem statement]?

#### Key rules of brainstorming

To run a smooth and productive session

 Stay in topic.

 Encourage wild ideas.

 Defer judgment.

 Listen to others.

 Go for volume.

 If possible, be visual.

## Step-2: Brainstorm, Idea Listing and Grouping

2

### Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

#### TIP

You can select a sticky note and hit the pencil icon to sketch! Icon to start drawing!

3

### Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

#### TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

## Step-3: Idea Prioritization

- Evaluated all brainstormed ideas based on Importance (Operational Impact) and Feasibility (Technical Ease of Implementation).
- Identified standardized catalog choice fields, Flow Designer approval workflow, automatic record insertion, and email notifications as high-priority features due to their high business value and ease of implementation.
- Considered infrastructure compliance logging, dynamic approval routing, and automatic incident creation as future enhancements because they require additional customization and scripting.
- Categorized portal progress tracking and enhanced email templates as secondary improvements that enhance user experience without affecting the core workflow.
- Assigned multi-level approval workflows and automatic timeout-based rejection a lower implementation priority because they add complexity and are not essential for the initial deployment.
- Focused the implementation roadmap on delivering the core automation workflow first, while reserving advanced features for future project phases.

4

### Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
